

AK5+

Anti Knock Fluid

AK5 + is a concentrated additive used to increase the octane number of unleaded petrol/gasoline from the pump.

AK5 + eliminates both the knocking in the cylinder head and the pre-ignition and post-ignition phenomena, allowing an increase in engine performance.

AK5 + can be used in both supercharged engines and turbo engines, be it for racing or for normal road use.

AK5 + used in one dose of 3 per thousand, increases the number of octanes of normal unleaded petrol/gasoline by 5 points = .

How to use the product:

To mix properly, pour the product in a container or directly into the tank, and then add unleaded petrol/gasoline.

Use in doses of:

1 litre for every 1,000 litres of 95 unleaded petrol/gasoline, up to a maximum of 3 litres per 1,000 litres of 95 unleaded petrol/gasoline.

DOSAGE CHART

	1/1,000	2/1,000	3/1,000
LITRES OF FUEL			
10 LITRE	10 ML.	20 ML.	30 ML.
20 LITRE	20 ML.	40 ML.	60 ML.
30 LITRE	30 ML.	60 ML.	90 ML.

APPLICATIONS:

Perfect for all CARS and MOTORCYCLES, both for normal road use and for racing

- Increased number of octanes

Superformula AK5 + is sold in 500 ml bottles.
