

100 Competition

A fuel with an excellent quality/price ratio, suited for racing and road cars. This fuel features a good specific weight and the right percentage of oxygen; these are values that make you appreciate the benefits in terms of performance without having to work on the carburettor. This fuel is suited for both aspirated and turbocharged engines.

It is recommended also for its efficacy in lowering the temperature in the combustion chamber, an important factor also for a longer life of the engine. Conforming to the F.I.A and CSAI standards

Conditions of Use: It can be used as is, since it does not require any adjustment to the fuel flow rate and to the spark advance.

Technical Data

Properties	Result	U.M.
Density	741	Kg/m3
Ron	100.9	NR
Mon	87.6	NR
Oxygen	2.4	% in weight
