

## TOP GUN

A fuel designed for all those engines designed during the lead gasoline period, used in the Mille Miglia rievocazione and in the Carrera Panamericana.  
Conforming to the CSAI and FIM standards.

It is a fuel rich with metals, suited for all engines with a high compression ratio and for vintage cars and motorbikes that need an adequate lubrication of the valve seats that was originally ensured by the old red gasoline containing lead, which will appreciate also its great cooling power.

Conditions of Use: It can be used as is, since it does not require any adjustment to the fuel flow rate and to the spark advance.

### Technical Data

| <b>Properties</b> | <b>Result</b> | <b>U.M.</b>       |
|-------------------|---------------|-------------------|
| Density           | 746           | Kg/m <sup>3</sup> |
| Ron               | 101.7         | NR                |
| Mon               | 89.8          | NR                |
| Oxygen            | 2.5           | % in weight       |
